By Fran Balkwill : Have a Nice DNA (Enjoy Your Cells Series Book 4) an earlier question in the last word gave warnings about eating leftover rice i have seen this advice before saying it is not safe to keep cooked rice for more than this review is based mostly see update at the end on the kindle edition of the book which is a quot;print replicaquot; edition which exactly matches the printed textbook Have a Nice DNA (Enjoy Your Cells Series Book 4):

18 of 18 review helpful Great for a kid with a lot of intellectual curiosity By KwS2913 My 8 year old daughter read this book on her own without asking questions and when she was done she had a clear understanding of genetics and DNA I was very impressed with the way the material was presented She was satisfied I am thrilled I am constantly on the look out for books that a second grader can understand that introduce Once upon a time you were very very small In fact you were made of just one tiny cell But the incredible thing about that tiny cell was that all the instructions to make you were hidden inside it And all because of a very important chemical substance called DeoxyriboNucleic Acid everyone calls it DNA Enjoy Your Cells is a series of children s books from the acclaimed creative partnership of scientist author Fran Balkwill and illustrator Mic Rolph About the Author Fran Balkwill is Professor of Cancer Biology at St Bartholomew s Hospital and the London Queen Mary School of Medicine Mic Rolph is a graphic

designer with much television and publishing experience Together they have created many books for
