Neurovirology the study of viral infection of the nervous system has evolved at the interface of three of the most rapidly unfolding fields of investigation neurobiology virology and immunology In all three increasing knowledge about the molecular structure of surface receptors how intracellular messages are transmitted and how diversity is regulated genetically is provided along with the techniques of molecular biology This promises to give u To bring together a team of distinguished specialists to discuss current aspects of neurovirology was an excellent idea This ambitious and successful review examines virus induced cell injury and neurological disease Referencing is comprehensive and up
