16 of 16 review helpful Excellent Supplement Reference For Work School By Living In SoCal This is quite a bit smaller than than the other BarCharts I have purchased It s about the size of a large index card does not have binder

holes opens like a book and is laminated It is very nice I do not have problems reading the text A reading magnifier would help anyone who does I am a huge fan of the BarCharts and 300 full color cards on 14 human body systems with images on one side and label text on the other so that students can test themselves easily There is nothing else that compares in quality of cards and price
