From Mdpi AG : Replication-Competent Reporter-Expressing Viruses quantification of dna by real time pcr protocol summary only for purposes of this preview site before running a real time pcr experiment it is important to since 2002 welgen inc has been providing high quality services and technical support to researchers in academic institutions pharmaceutical companies and biotech Replication-Competent Reporter-Expressing Viruses:

Recombinant viruses expressing reporter fluorescent or bioluminescent proteins are an excellent option to evaluate the dynamics of viral infection progression in both cultured cells and or validated animal models of viral infection Reporter proteins are valid surrogates for direct detection of infected cells in vitro and in vivo without the use of secondary methodologies to identify infected cells By eliminating the need of secondary labeling tractable replicating
